

Assignment: Text Challenges

Date: 20/03/2026

Name: Aashish Chaudhary (1CR22CS003)

Objective

To analyze messy real-world text data and identify issues like slang, emojis, and typos, along with required preprocessing steps.

Messy Sentences with Issues & Preprocessing

omg this movie was littt 🔥 → Slang, repetition, emoji → Normalize, remove repetition

I cant beleive this happnd 🤖 → Typos → Spell correction

lol u r so funny 😂 → Slang, abbreviation → Expand words

dis is not gud at all → Typos → Correct spelling

brb going 2 the store → Slang, numeric → Normalize text

soooo tired rn 😴 → Repetition, slang → Reduce letters

whr u doing?? → Abbreviation → Expand words

idk what to do 😞 → Slang → Expand slang

this is amaznggg!!! → Typo, repetition → Normalize

plz hlp me asap!!! → Abbreviation → Expand words

heyyy wassup brooo → Repetition → Normalize

I luv this song ❤️ → Slang, emoji → Replace/remove

cant stop laughin 😂😂 → Informal, emoji → Normalize

ths sntnce hs no vwls → Missing vowels → Reconstruct

gud mrng everyone 🌞 → Abbreviation → Expand

ur gr8 at coding!! → Slang → Normalize

sm1 pls explain dis → Slang → Expand

omg!!! wt just happnd?? → Slang, typo → Correct

im sooo happpppyy 😊 → Repetition → Reduce

bcz of u I failed 🙄 → Slang → Expand

Common Issues Identified

Slang (omg, lol, idk)

Abbreviations (u, r, plz)

Typos and spelling errors

Repeated characters

Emojis and symbols

Missing vowels

Preprocessing Techniques

Lowercasing

Tokenization

Slang expansion

Spell correction

Removing repetitions

Emoji handling

Stopword removal

Lemmatization/Stemming

Conclusion

Messy text is common in real-world data. Proper preprocessing improves text quality and helps NLP models perform better.
